

Microsoft Dynamics NAV 2013

Gain Greater Control:

Greater control is about having visibility into how your business is performing—it's about knowing that your system will help drive decision-making processes and enable your people to be more proactive and productive. Microsoft Dynamics NAV gives you the confidence that the right people in your organization are making the right decisions. And it delivers the insight you need to monitor business performance from every possible angle—from employee time and resources to inventory and shipping.

“ With Microsoft Dynamics NAV, employees have visual cues to help them see exactly what they need to do next to move business forward. ”

- Ricky Vogel, CIO, Gumdrop Books and Mitinet

Increase Your Margins:

Cash is king—and when you make fast, informed decisions, it has a direct impact on your bottom line. With Microsoft Dynamics NAV, you can make smart decisions and automate key business processes across the board—from buying and inventory management to customer credit and payment terms—to drive down costs and turn margins into cash flow.

“ We realized full payback within two years after deploying Microsoft Dynamics NAV. ”

- Klas Elmroth, Finance Director of Support Services, Thomas Cook Northern Europe

- Look for trends and relationships
- Increase collaboration and share knowledge

Microsoft Dynamics NAV 2013

Grow Your Business:

You and your employees share a common aspiration to grow your business. To reach this goal, you need a solution that can support changing demands along the way. Microsoft Dynamics NAV delivers the flexibility you need to accommodate new business processes and scale as your business grows without significant increases to your original investment—or your payroll.

Gain Simplicity, Agility and Value

Microsoft Dynamics NAV is designed to empower your people to be more productive and your systems to last longer, with the ability to scale to accommodate growth, all while delivering the insight you need to respond quickly in an ever-changing world of business.

Simple to Learn and Use

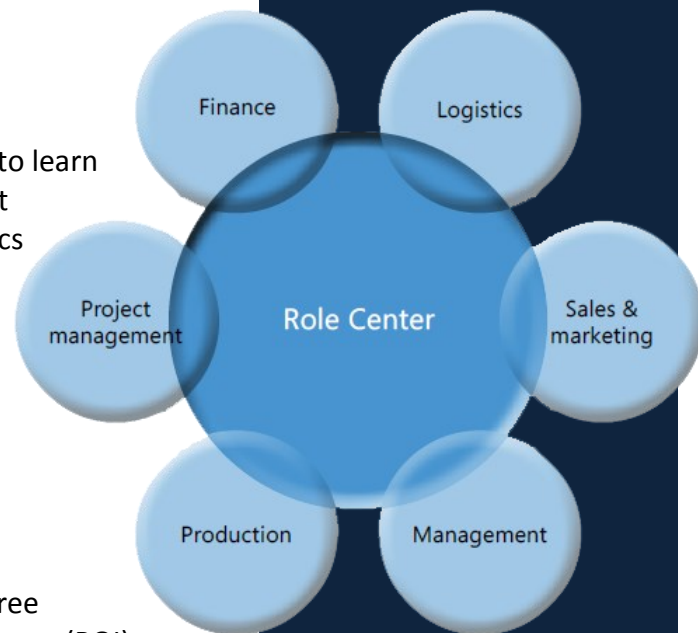

Simplicity is at the core of Microsoft Dynamics NAV. It is easy to learn and use because it works like and with other familiar Microsoft technologies, such as Microsoft Office. And Microsoft Dynamics NAV works the way you work, so it's easier for you and your employees to make better decisions and get more done. Simplicity is built into every aspect of your experience—from initial purchase and deployment to ongoing maintenance and upgrades.

Drives Value for Your Business

Microsoft Dynamics NAV delivers value for your business in three important ways. First, you can increase your return on investment (ROI) as you boost productivity and create new ways to control expenses, helping to drive profitability. Second, Microsoft Dynamics NAV offers interoperability with the other technologies you already use in your organization to help lower your total cost of ownership (TCO). Finally, you can achieve maximum benefit from your technology investment through improved time to value, especially when you don't want or need an extensive IT infrastructure.

“ We can better align our inventory with demand, which lets us reduce our stock levels for some categories by as much as 30% and reinvest those resources in products that are selling well. ”

- Ricky Vogel, CIO, Gumdrop Books and Mitinet

Role Centers covering essential business functions in six areas of an organization.

About Accent Software:

In today's world, small and mid-sized businesses can have a global reach, and as their networks expand, so too does the likelihood that a company could devote insufficient attention to one of its business units. All elements of an organization need to be aware of how the others operate, or they could push in one direction while another is unknowingly pulling in another.

It comes down to three vital elements, without which a business cannot function – communication, collaboration and business intelligence.

Here at Accent Software, we help businesses gain control over these vital elements, allowing them to better manage their business and facilitate growth. Whether your business is local to Indiana or operating globally, we want to work with you.

Our history and expertise is with manufacturing and service oriented business. Whether you make repetitive products or highly customized, customer-specific products, we have a great solution for your business challenges. Our team will work with you to discover your core business needs and vision. We then show you how technology can foster the control, margin, and growth you are looking for in those areas. Finally, we map out the implementation plan to allow you to achieve your vision.

Our consultants are ready to get the conversation started!
